

FORMULATION & REGULATORY SERVICES

FULL-SERVICE RESEARCH / DEVELOPMENT AND TESTING LABORATORY

Whether you need an existing product modified, a competitive product matched or a brand-new product formulated, our staff of chemists and dedicated project managers are up to the task.

In addition to our line of proprietary products, we specialize in formulating custom contract aerosol packaging across a large variety of industries. Utilizing an on-site lab, our staff of chemists can help with all phases of product development, including research and development, regulatory support, and packaging.

RESEARCH & DEVELOPMENT

Formulation Expertise:

- Working with your dedicated project manager, our staff of chemists has the formulation experience and facilities to develop your product from concept to finished product
- Having problems with your current supplier, our team of chemists have experience troubleshooting customers' existing product performance issues
- Prototype Development - Our lab has the capability of developing test samples up to field trial quantities
- Specialized color analysis and formulation capabilities

RAPID IN-HOUSE PROTOTYPE GENERATION

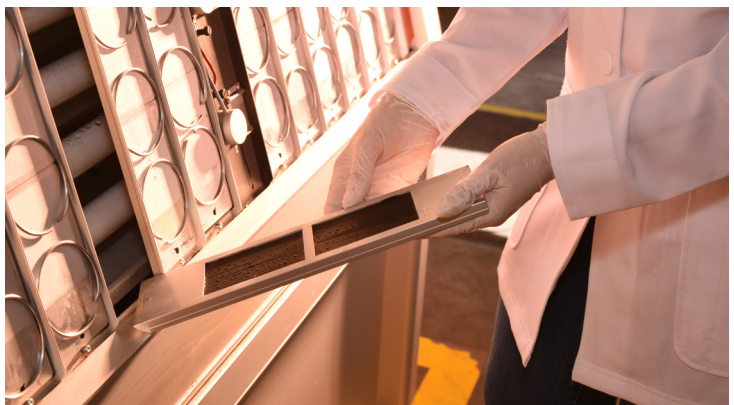

Our in-house sand mill reduces lab development time.

TESTING CAPABILITIES

Product Performance Optimization:

- Chem-Pak® maintains one of the most comprehensive laboratory testing systems vs. the competition and offers troubleshooting, performance testing and compliance and specification testing.
- To help ensure accurate physical properties, shelf stability and product efficacy, our lab thoroughly tests your product with our in-house testing equipment.

OUR ON-SITE TESTING CAPABILITIES REDUCES DEVELOPMENT COSTS AND SPEEDS TIME TO MARKET

QUV testing allows for the development of high performance coatings.

REGULATORY & COMPLIANCE

- Multi-lingual GHS / OSHA complaint SDS development
- Labeling compliance guidance
- WERCs registration assistance
- NSF certification assistance
- VOC & MIR compliance
- DOT - shipping classification and carton labeling assistance

DEDICATED REGULATORY SUPPORT SPECIALISTS

Our regulatory department ensures your products meet all state and federal regulations, including proper labeling requirements, comprehensive SDS's, and guidance on shipments.
