**General Measures** : *Call a physician immediately.*

**Inhalation** : *Remove person to fresh air and keep comfortable for breathing.*

**Skin Contact** : *Rinse skin with water/shower. Remove/Take off immediately all contaminated clothing. If skin irritation occurs: Get medical advice/attention.*

**Eye Contact** : *Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.*

**Ingestion** : *Do NOT induce vomiting. Call a physician immediately.*

**First-Aid Responder Protection** : *Wear adequate personal protective equipment based on the nature and severity of the emergency.*

### 4.2 Most Important Symptoms and Effects, Both Acute and Delayed

**Symptoms of Exposure** : *Eye Irritation, Nose Irritation, Throat Irritation, Lassitude (Weakness), Dermatitis, Confusion, Skin Irritation, Headache, Dizziness, Nausea, Narcosis, Upper Respiratory Tract Irritation, Drowsiness, Vomiting, Optical Nerve Damage, Cough, Chest Tightness, Chemical Pneumonitis (Aspiration Liquid), Numbness, Mucous Membrane, Diarrhea.*

**Delayed Effects** : *No known delayed effects.*

**Immediate Effects** : *No known immediate effects.*

**Chronic Effects** : *Methyl alcohol may be fatal or cause blindness if swallowed. Repeated or prolonged contact may cause skin sensitization.*

**Target Organs** : *Central Nervous System, Eyes, Gastrointestinal Tract, Liver, Nasal Cavity, Peripheral Nervous System, Reproductive System, Respiratory System, Skin, Kidneys.*

### 4.3 Indication of Immediate Medical Attention and Special Treatment

**Notes to Physician** : *Treat symptomatically.*

**Specific Treatments/Antidotes** : *No Information Available.*

**Medical Conditions Aggravated** : *May aggravate personnel with pre-existing disorders associated with any of the Target Organs.*

## SECTION 5 - FIRE-FIGHTING MEASURES

### 5.1 Suitable Extinguishing Media

**Extinguishing Media** : *Water, carbon dioxide, dry chemical, universal aqueous film forming foam.*

**Unsuitable Media** : *Water jet.*

### 5.2 Specific Hazards Arising from the Chemical or Mixture

**Hazardous Combustion Products** : *Decomposition products may include: oxides of carbon, smoke, vapors. See also Section 10.6.*

**Specific Hazards During Firefighting** : *CONTENTS HIGHLY FLAMMABLE. In a fire or if heated, a pressure increase will occur which may result in container bursting. Vapors heavier than air may spread along the ground and travel to an ignition source.*

### 5.3 Special Protective Actions for Fire-Fighters

**Firefighting Instructions** : *Use water spray to cool fire exposed containers, as contents can rupture violently from heat developed pressure.*

**Protection during Firefighting** : *Firemen should wear self-contained breathing apparatus with full face-piece operated in positive pressure mode.*

## SECTION 6 - ACCIDENTAL RELEASE MEASURES

### 6.1 Personal Precautions, Protective Equipment and Emergency Procedures

**For Non-Emergency Personnel** : *No action should be taken involving any personnel without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill. Remove ignition sources and provide adequate ventilation only if it is safe to do so.*

**For Emergency Personnel** : *Use personal protection as recommended in Section 8. Observe precautions provided for non-emergency personnel above.*

### 6.2 Environmental Precautions

**Environmental Precautions** : *Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.*

### 6.3 Methods and Materials for Containment and Cleaning up

**Containment Procedures** : *Released content may be contained with oil/solvent absorbent pads, booms, and/or absorbents.*

**Cleanup Procedures** : *Spills from aerosol cans are unlikely and are generally of small volume. Large spills are therefore not normally considered a problem. In case of actual rupture, avoid breathing vapors and ventilate area well. Remove sources of ignition and use non-sparking equipment. Soak up material with inert absorbent and place in safety containers for proper disposal.*

**Other Information** : *The North American Emergency Response Guidebook or similar resources providing emergency response information for dealing with accidents, spills, leaks, and/or fires involving dangerous goods.*

**Prohibited Materials** : *Combustible absorbent material such as sawdust. Use of equipment that may cause sparking.*

## SECTION 7 - HANDLING AND STORAGE

### 7.1 Precautions for Safe Handling

**General Handling Precautions** : *KEEP OUT OF THE REACH OF CHILDREN. When using in spray application, conformance to NFPA 33 Spray Application using Flammable and Combustible Materials is recommended.*

**Hygiene Recommendations** : *Do not eat, drink or smoke when using this product. Wash hands thoroughly after use. Remove contaminated clothing and protective equipment before entering eating or smoking areas.*

### 7.2 Conditions for Safe Storage Including Any Incompatibilities

**Storage Requirements** : *Storage of individual cans should be done in an area below 55°C (120 °F), and away from heat sources. For storage of pallet quantities, compliance with NFPA 30B (Manufacture and Storage of Aerosol Products) is recommended. Keep containers closed when not in use. Do not store in open or unlabelled containers.*

**Incompatibilities** : *Segregate storage away from materials indicated in Section 10.*

## 8.2 Exposure Controls

**Engineering Measures** : *Use only with adequate ventilation. General ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Local exhaust ventilation or an enclosed handling system may be necessary to control air contamination below that of the lowest OEL from the table above.*

**Personal Protective Equipment**

**Eye / Face Protection** : *Safety glasses with side shields are recommended as a minimum for any type of industrial chemical handling. Where eye contact with this material could occur, chemical splash proof goggles are recommended.*

**Hand Protection** : *Chemical-resistant gloves, tested according to ASTM F903 - 17.*

**Remarks** : *Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to the place of work.*

**Skin and Body Protection** : *For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or repeated contact could occur, use protective clothing impervious to the ingredients listed in Section 2.*

**Respiratory Protection** : *An approved respirator may be permissible under certain circumstances where airborne concentrations are expected to exceed occupational exposure limits. Under those circumstances, users should be provided with either a half-facepiece (if wearing safety glasses) or a full-facepiece (if not wearing safety glasses) air-purifying respirator, fitted with organic vapor cartidges and P95 filters.*

**Compliance** : *If needed, compliance with OSHA standard 29 CFR 1910.134 is necessary.*

**Other Protective Equipment** : *Safety showers and eye-wash stations should be available in the workplace near where the material will be used.*

**Environmental Exposure Controls** : *Avoid release to the environment.*

## SECTION 13 - DISPOSAL CONSIDERATIONS

### 13.1 Waste Treatment Methods

**Waste Disposal** : *Product is suitable for burning in an enclosed, controlled burner for fuel value. Hazard characteristics and regulatory waste stream classification can change with product use and location. Accordingly, it is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste material must be disposed of in compliance with the respective national, federal, state, and/or local regulations.*

**Waste Disposal Of Packaging** : *Consult with your local landfill to determine if empty small containers can be disposed of along with regular trash pickup. For disposal of large containers (typically 10 gallons or larger), or for containers not suitable for landfill, a licensed reconditioner should be used.*

**Landfill Precautions** : *Not Available.*

**Incineration Precautions** : *Not Available.*
